

Don't Eclipse Your Stories

I met Angie at a Townsquared meeting in Ballard one spring night. She is the Co-Founder & CEO of LifeCapsule Productions that provide personal documentaries for seniors to capture their stories and wisdom on film as well as video portraits for small businesses and entrepreneurs.

Angie's Story:

On one of my Christmas visits home I captured some of my grandmother's stories on film in a pretty homemade fashion, but when she passed suddenly three months later, I shared it with my family as a gift and an honor to Gram.

The family cherishes the video and I was so glad I did the video, just in the nick of time.

Last year, I was volunteering at a retirement home on Greenlake and was hearing stories from amazing folk there. **That's when the light bulb went off** ~ these people need their stories preserved too! So we started making films with residents there.

I started doing some research on the web about legacy type videos and realized there wasn't much in the area. My first google search was generic; it was simply "legacy films for seniors."
