Five Easy Steps for Capturing Your Stories

*Because Knowing Your Stories Helps Us To
Know Our Stories Too!*

A Great Holiday Idea Either Professionally or Do-It- Yourself

Professional

I'm looking at storytelling, memoirs and the writing experience in a completely different way. I listen to people for ninety minutes, transcribe and polish their words so that the end product is a 60-page softbound 6"x9" book. I would go here (www.bethlord.com) if you want to see my video and website for more information when you are finished reading this email.

I'm offering a Holiday Special to people who are interested in purchasing this Holiday Special for themselves or someone they know because it's a beautiful way to capture stories.

Everyone has a story to tell, and I've devised a natural, creative and affordable way to get this done. Yes, I do all of the editing :).

Please pass this on to people you know who would love this reasonable means of getting a printed book for themselves and their family.

Holiday Special.
